

Amendments to the Specification:

Please replace paragraph [0032] on page 8, with the following paragraph:

[00032] As shown in Figure 7, panel units may be formed in sections. Here, top panel unit 152 comprises first body 156 and second body 160. First body 156 is pressed into second body 160 at border 164 in the direction of arrow H. Both first body 156 and second body 160 define a receiving cavity 165 of first snap-fit connector 166 to receive first mating connector 40, as shown. Similarly, second bottom panel unit 164 has third body 168 and fourth body 172. Fourth body 172 is pressed into third body 168 at border 164 in the direction of arrow H as well. Because second body 160 is pressed into first body 156, snap-fit connector 166 may still flexibly engage first mating connector 40 of second panel unit 80. Similarly, because fourth body 172 is pressed into third body 168, snap fit connector 176 may engage insulating body 54 in a snap-fit fashion.
